FRANCIS JULES C. ESPARTERO

JARO, ILOILO CITY PHILIPPINES

ABOUT ME

I am Francis Jules C. Espartero 21 years old. I choose the field of Computer Science because I wanted to create some software systems that may help in the future .I am curious on how the games, website , systems and application works using programming languages so I choose this degree to build my own website and system to be used by the users . I am talented student with industrious and systematic approach and eager to learn some information. Open and clear worker with disciplined execution, methodical nature excellent observational, organizational and communication skills. Extensive knowledge of re search and software skills.
